

The latest platform updates!

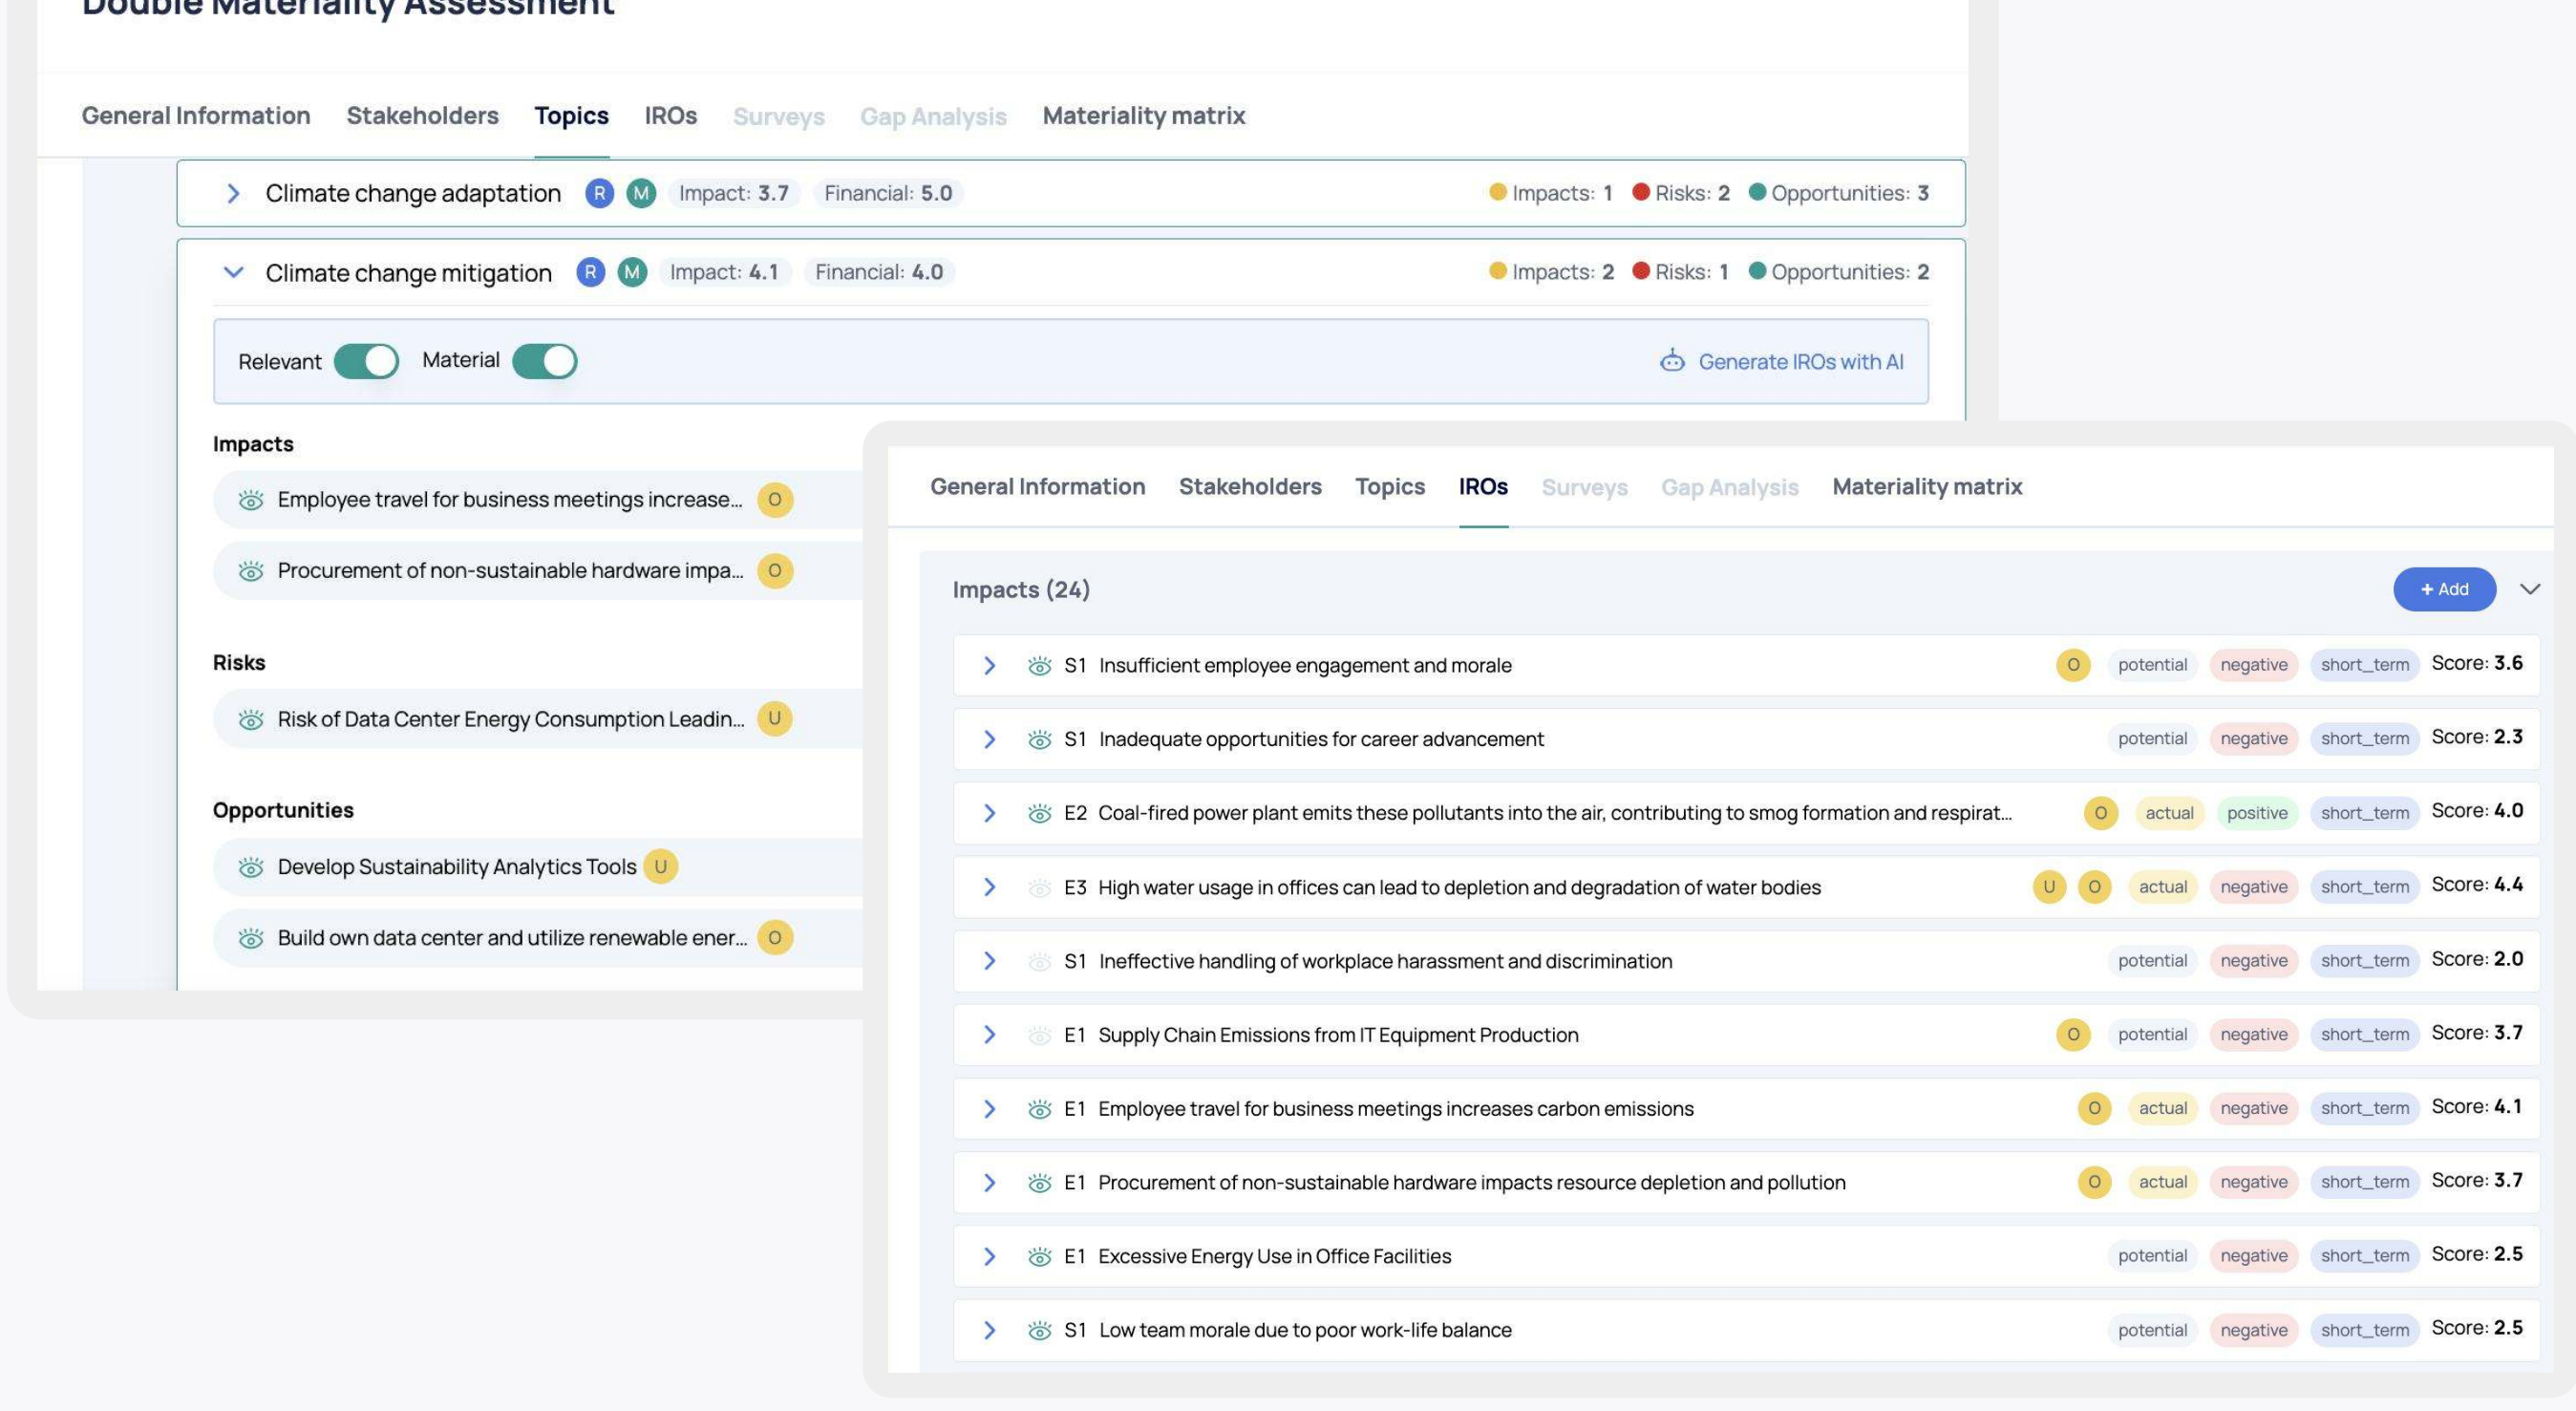

DMA module, KPI Dashboard, Organizational Structure, Payments with Stripe.

1. Enhanced Double Materiality Assessment (DMA) – Version 2

We've redesigned the Double Materiality Assessment module to be more efficient and user-friendly. A new DMA tutorial video is now available in the [ESG "Knowledge Share" section](#).

Key updates include:

- Streamlined workflows to simplify the assessment process.
- User-inspired improvements that better meet your daily needs.

Introducing IRO Data Import. Managing Impacts, Risks, and Opportunities (IRO) is now easier with our new data import feature.

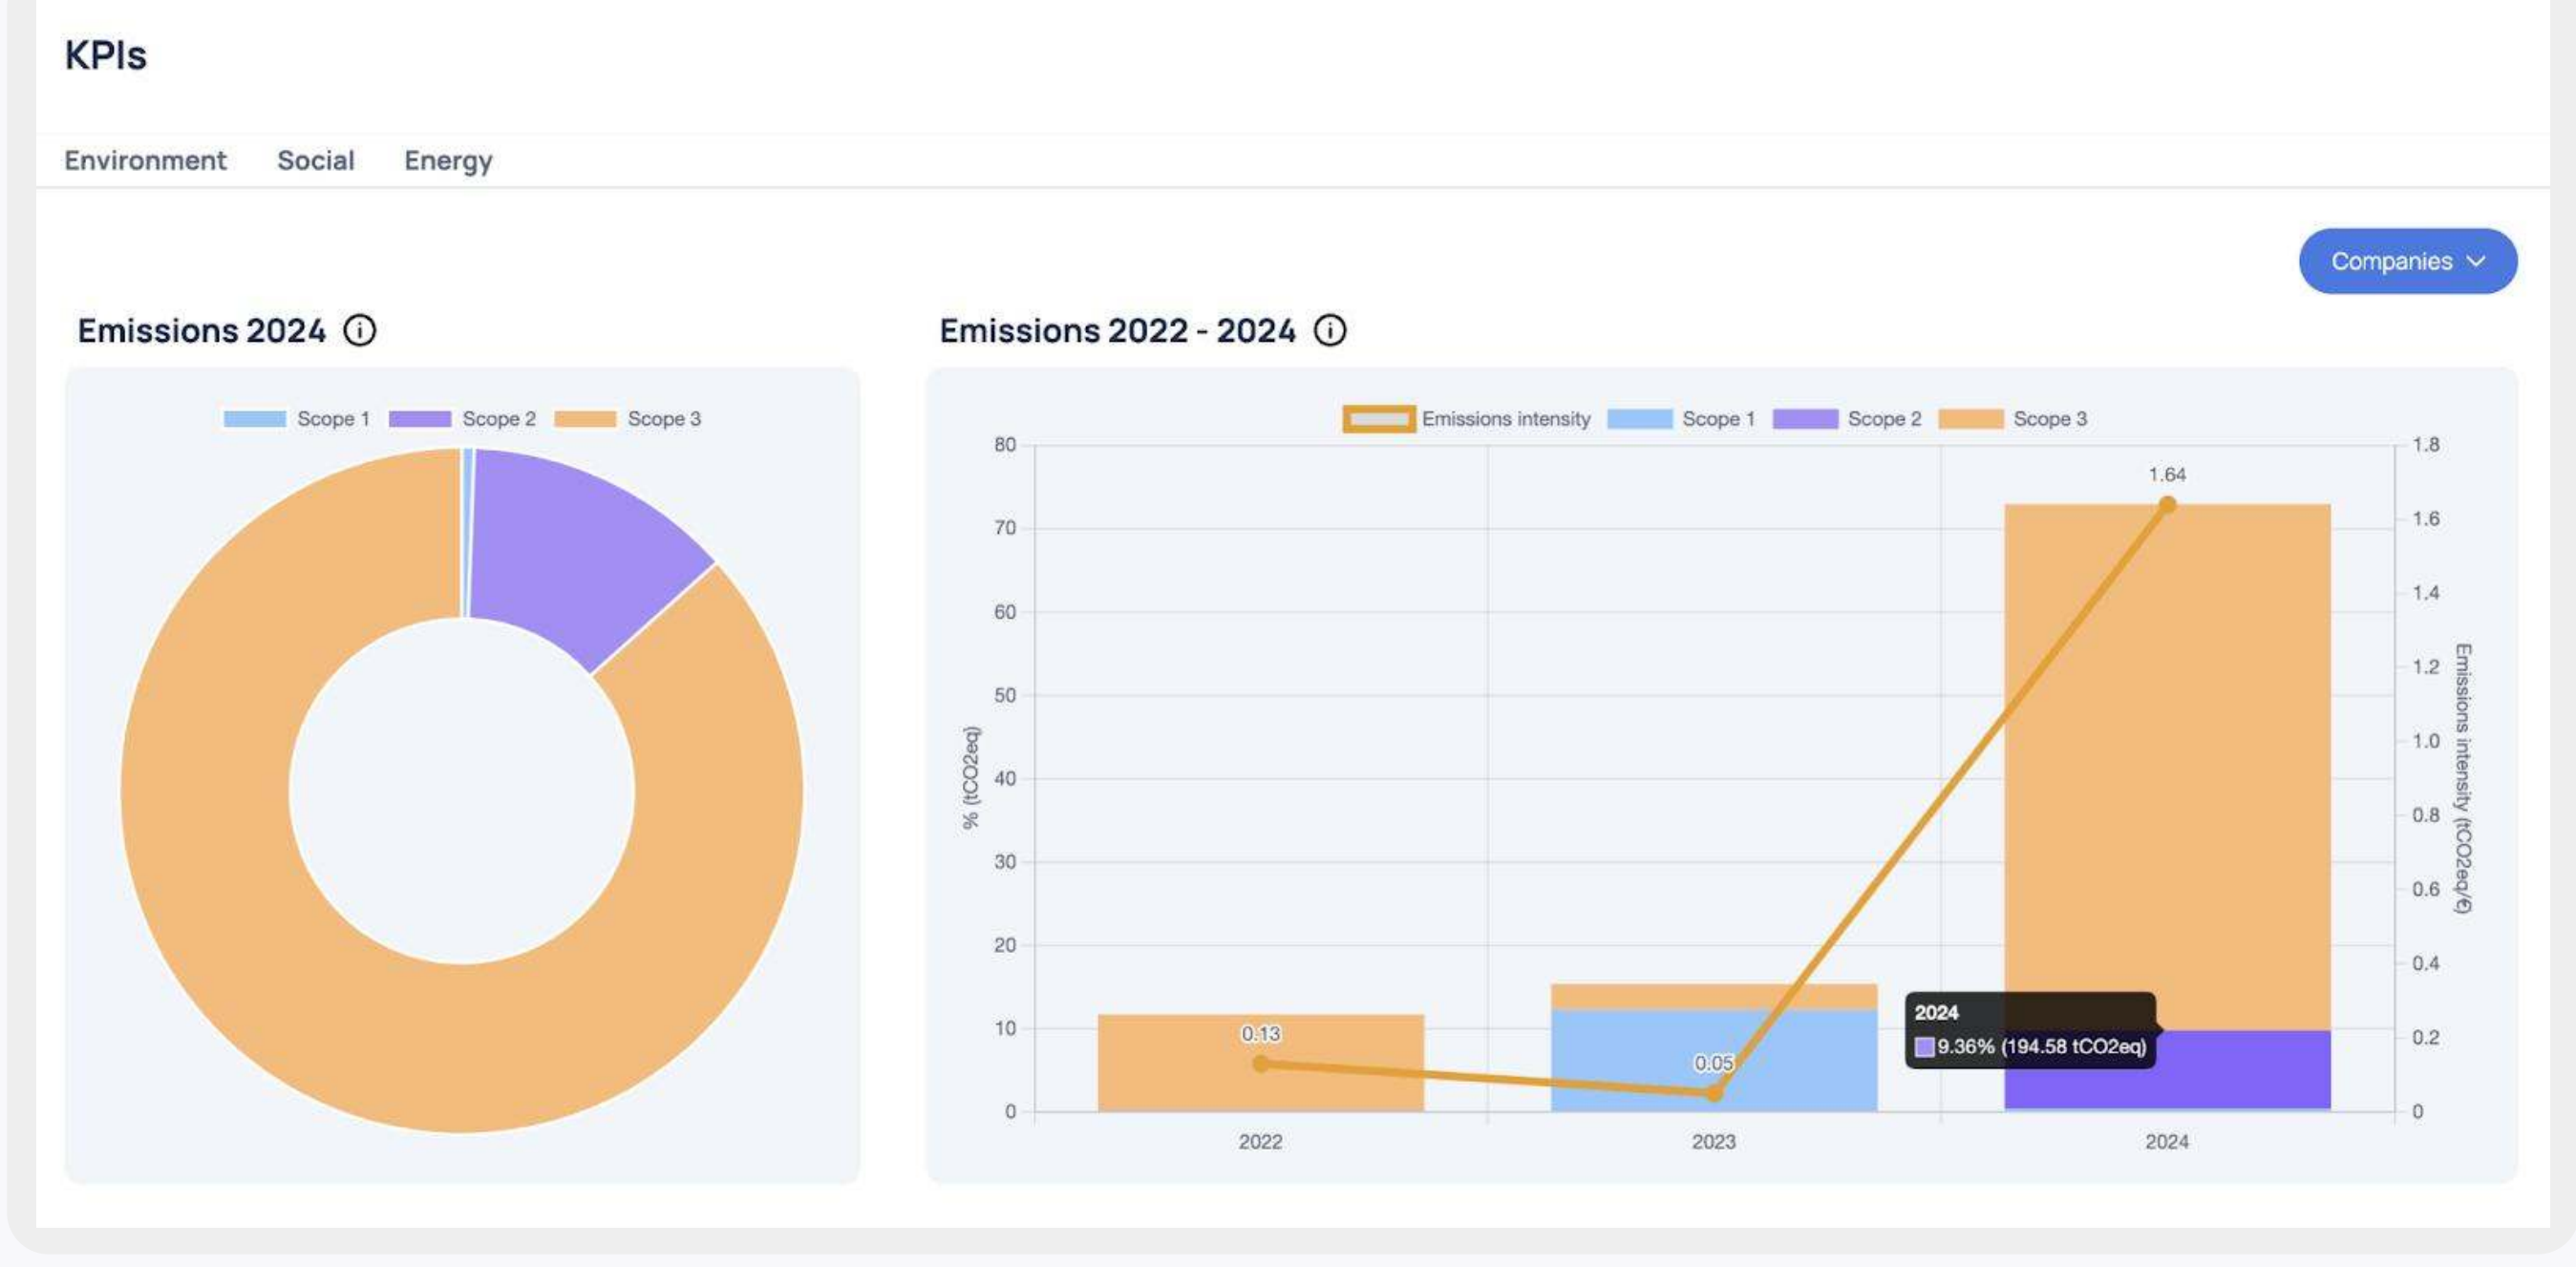

Here's how it works:

Download the template from the platform, populate it with your data, upload the completed file back into the system.

2. New KPI Dashboard

Our updated KPI section provides a clear and visual overview of numerical data trends, correlating them with other company metrics. Monitor your data across multiple years effortlessly.

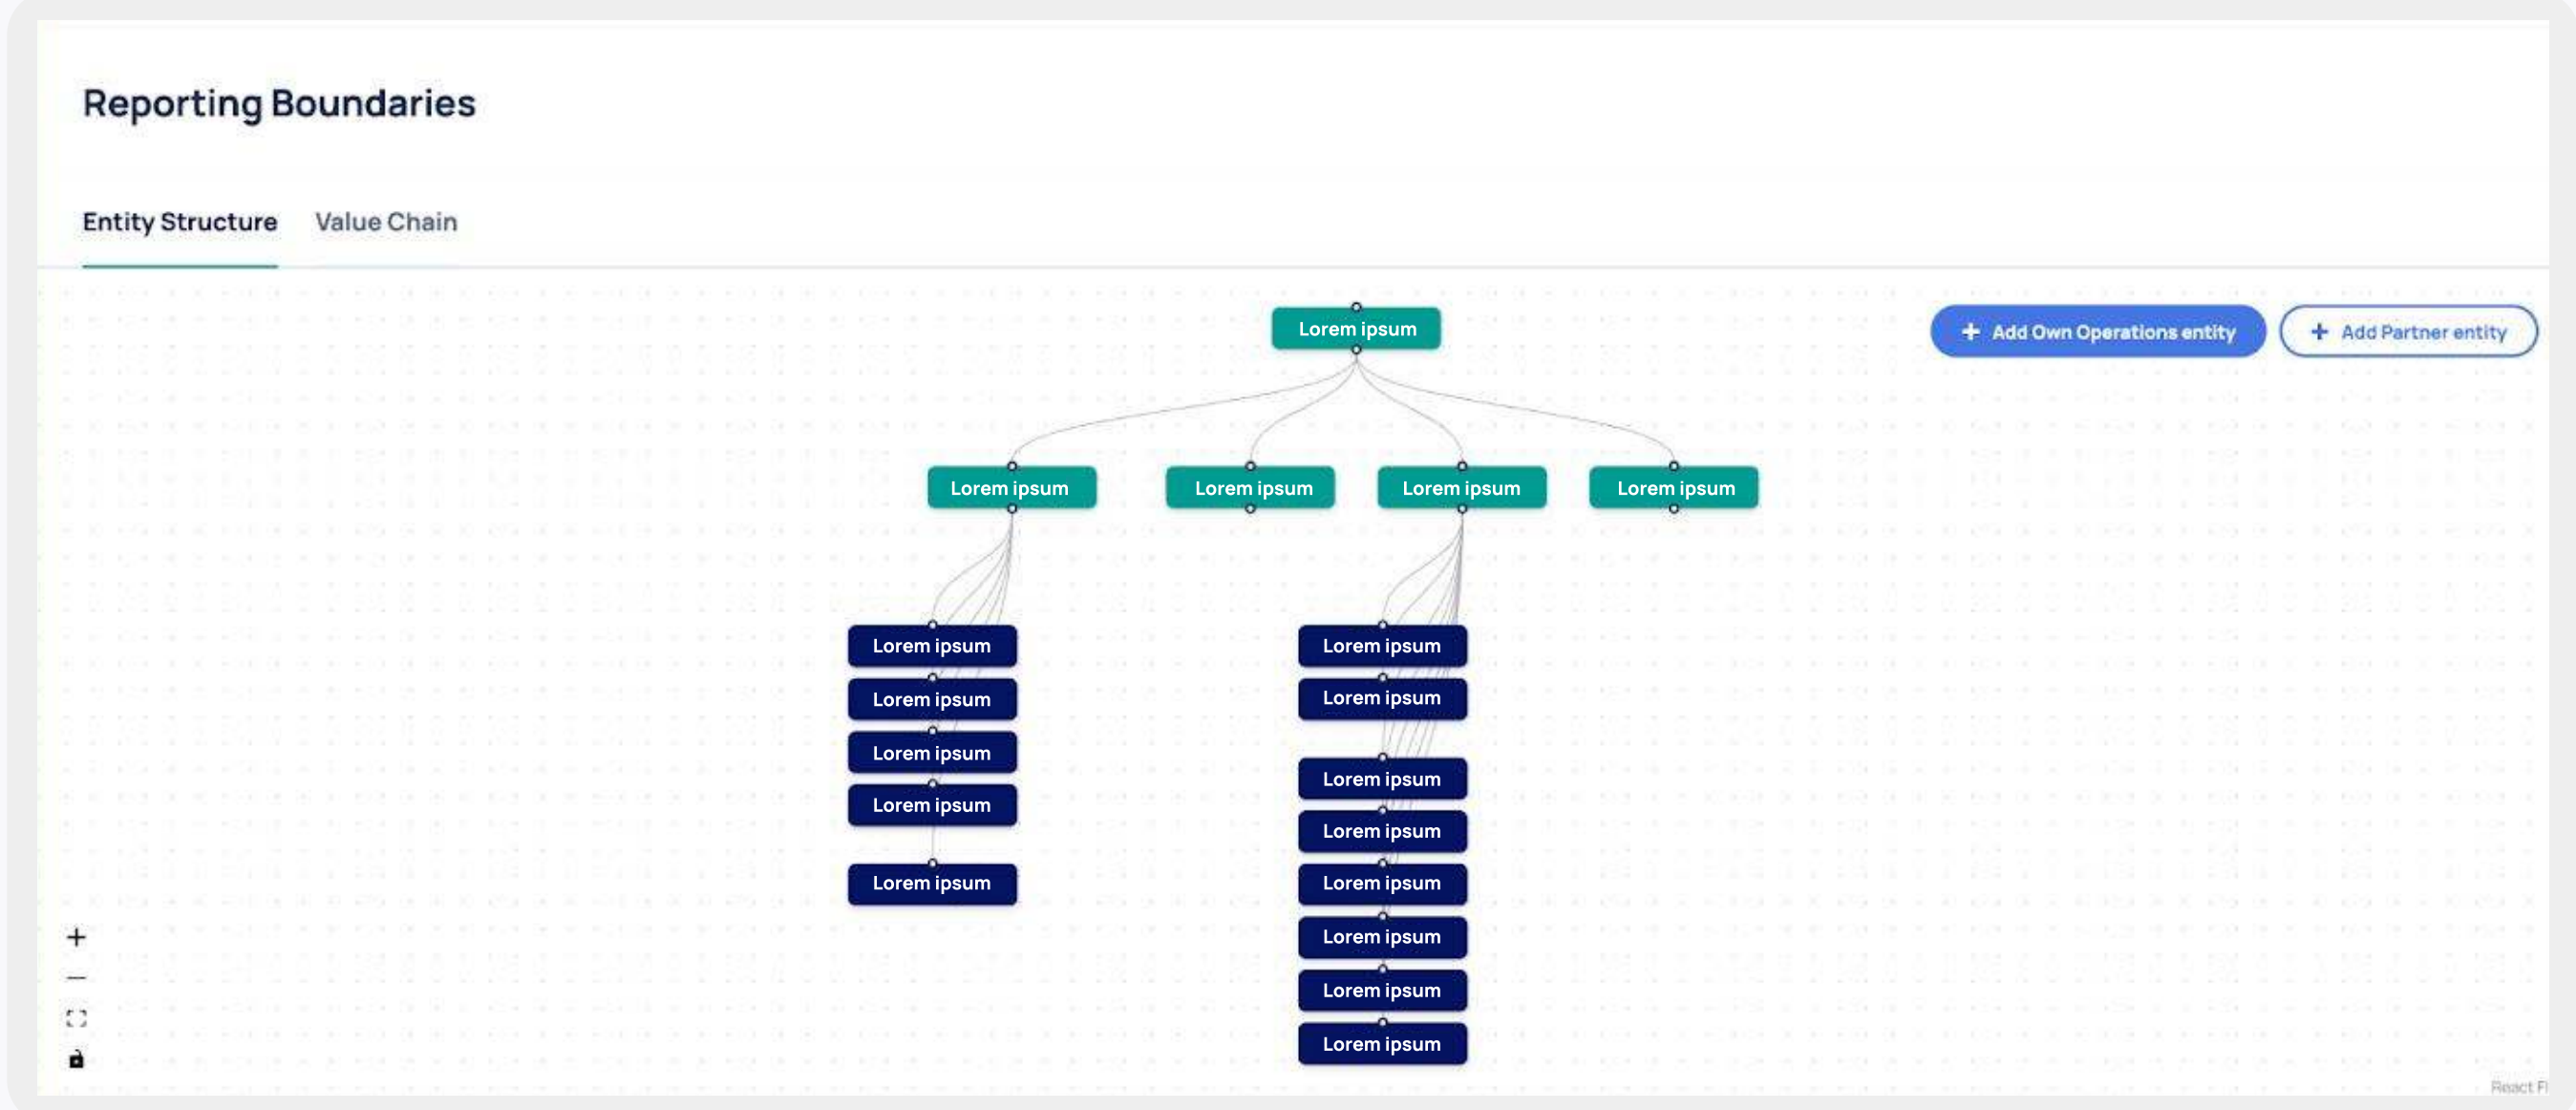

More KPIs are on the way, as we continuously enhance this feature!

3. Visualized Organizational Structure

You can now map your company's organizational structure, including primary collaboration partners. Assign impacts, risks, and opportunities (IRO) to each unit, partner, and group company.

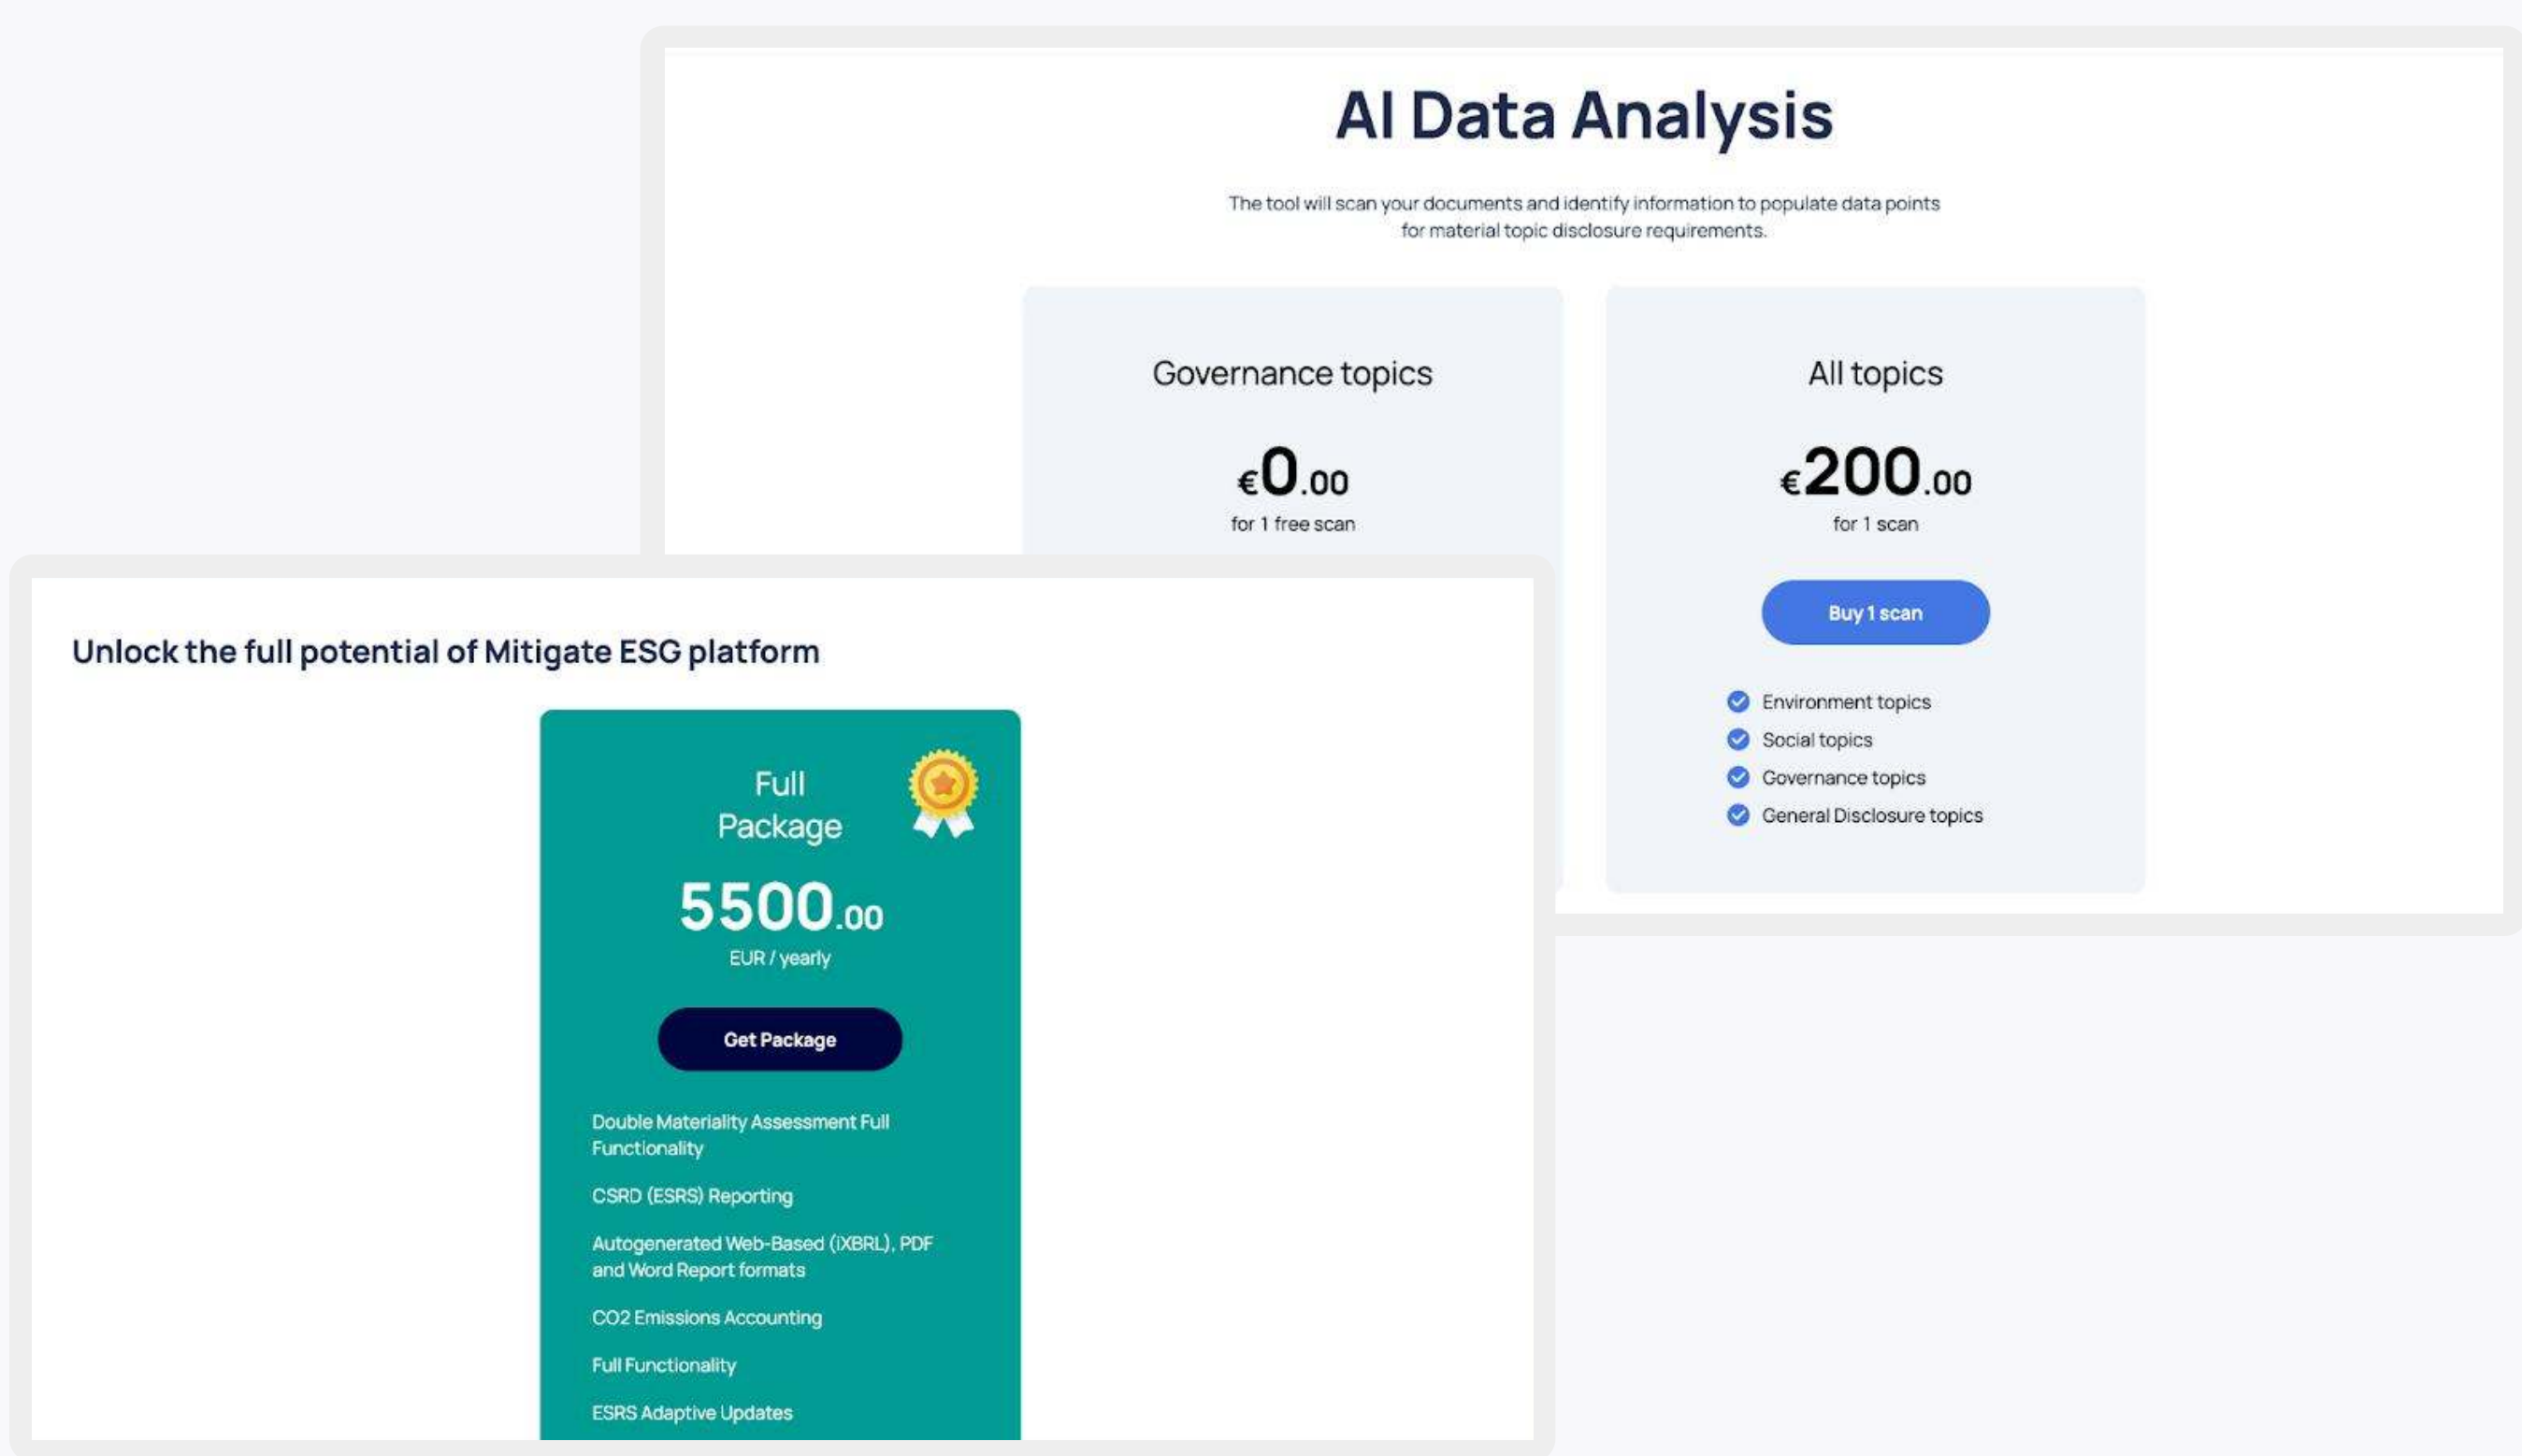

Future updates will expand and refine this functionality for an even smoother user experience.

4. Streamlined Payments with Stripe

We've integrated Stripe to make transactions faster and simpler!

Use it to: Renew your ESG subscription seamlessly for uninterrupted platform access, purchase the Mitigate ESG AI Assistant for document analysis, enabling quick data generation from uploaded files.

What's Coming Next?

Stay tuned for exciting updates to further streamline sustainability data management:

- Improved information request functionality for a more intuitive experience.
- Enhanced survey tools for efficient data collection and processing.

Your input is invaluable! Send us your thoughts and suggestions at esg@mitigate.dev, and help us continue building a platform that best meets your needs.

Warm regards,
The Mitigate ESG Team
