

ESG platform updates!

Improved AI Data Analysis Module

- **Enhanced Control:** You can now Approve or Reject AI recommendations, putting you in full control of data analysis.
- **Clearer Insights:** A new layout offers a cleaner, more intuitive review of AI recommendations.
- **Document Referencing:** Each recommendation now links directly to its source document, ensuring transparency.

Document Validation

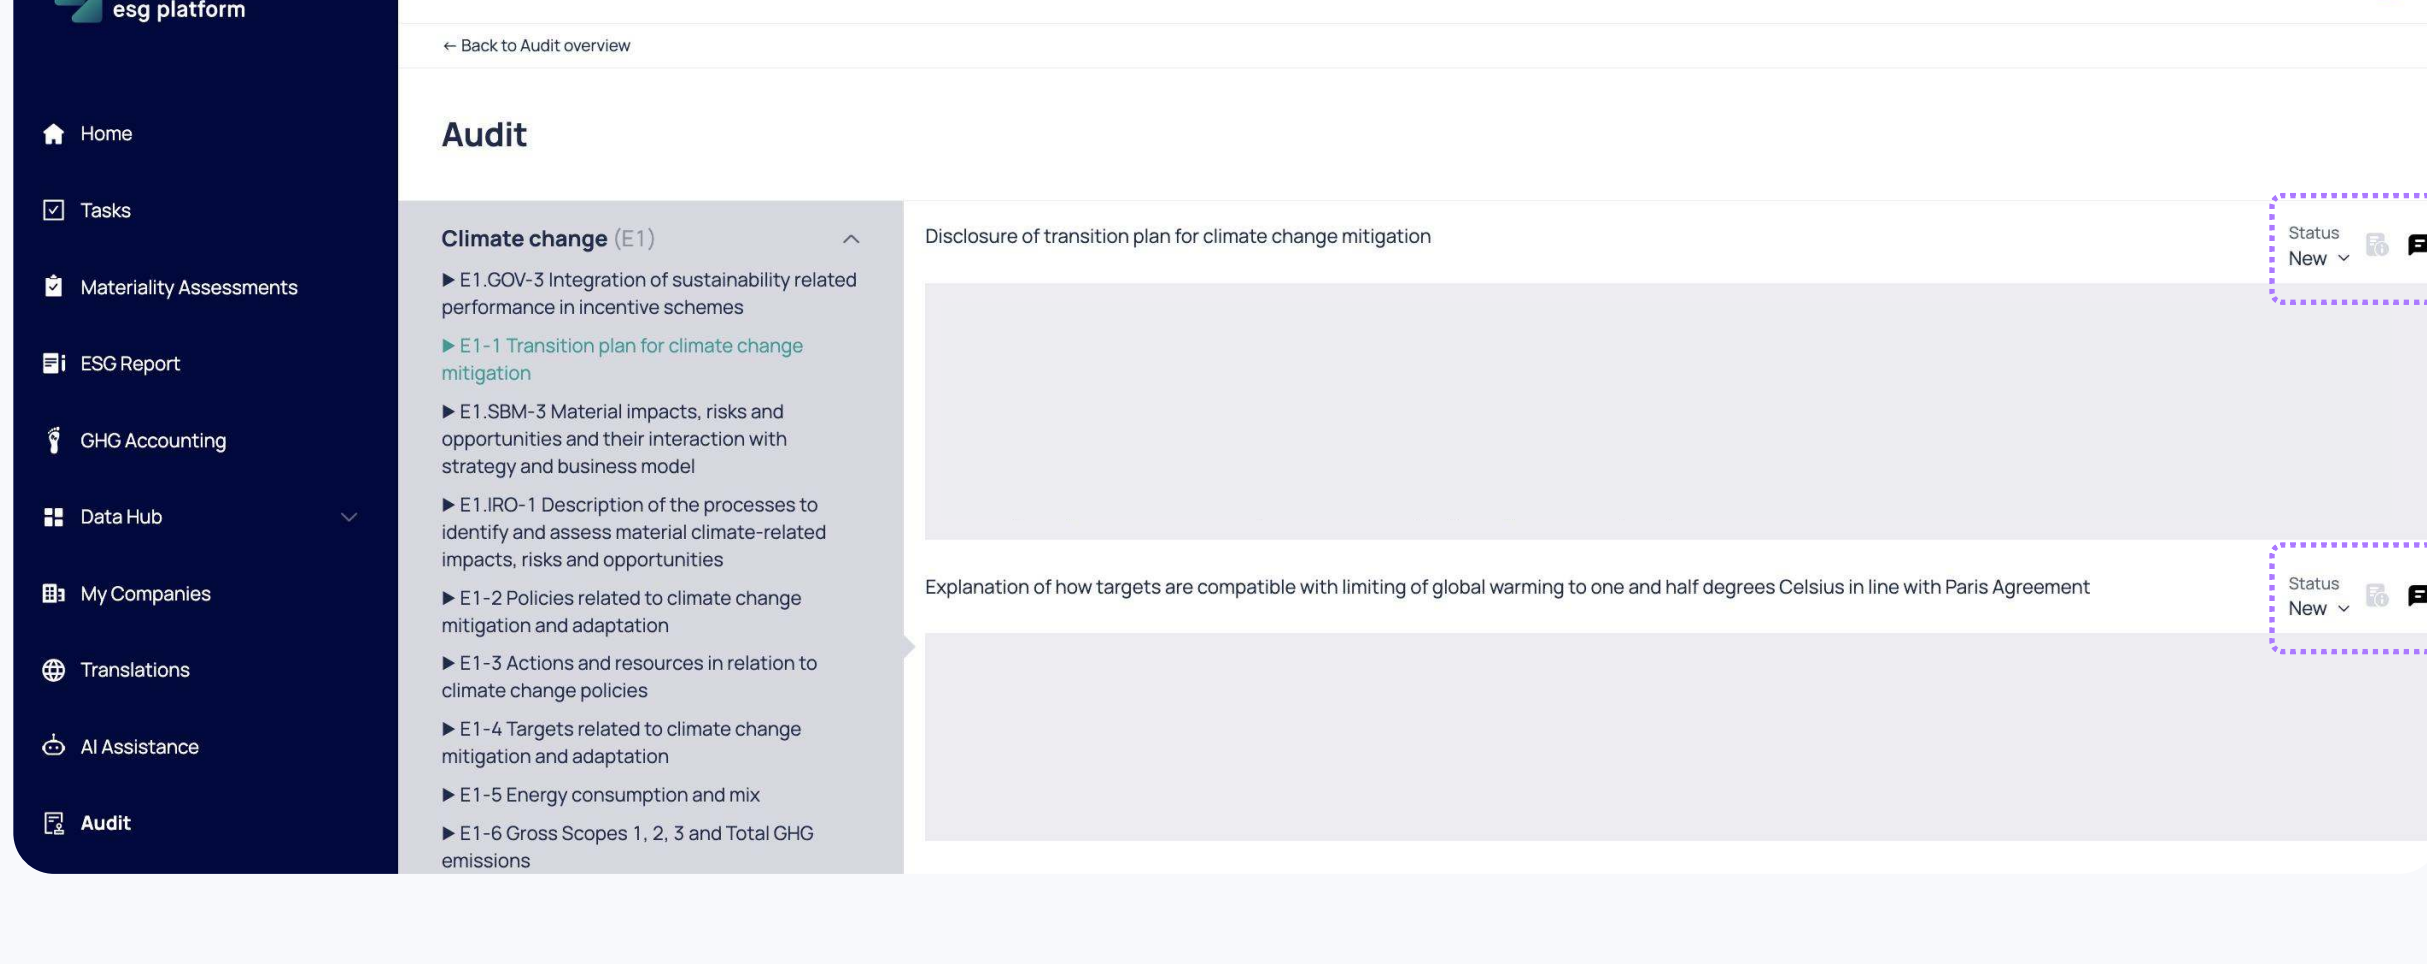

Immediate Compatibility Check: The platform now instantly checks file format compatibility during uploads, helping prevent upload issues.

New Decarbonization Section under "GHG Targets"

Tailored Targets: Users can now add specific decarbonization actions in the "GHG Targets" section, making it easier to plan and track progress toward sustainability targets.

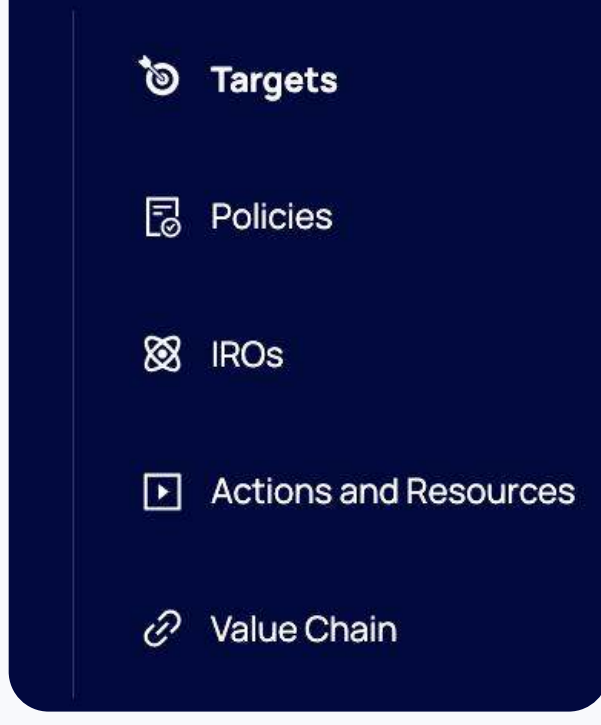

New Auditor Role

- **Audit Insights and Features:** We've introduced a new "Auditor" role for both internal and external auditors. Auditors can:
 - Access audit reports,
 - Flag data points as audited and add comments to streamline the audit process,
 - Review the origin of data for each point, ensuring full transparency and accuracy.

Enhanced ESG Data Linking

Connected Data: You can now link various ESG elements—including targets, policies, action plans, resources, impacts, risks, and opportunities (IROs)—creating a cohesive and accessible ESG data structure for easier analysis and management.

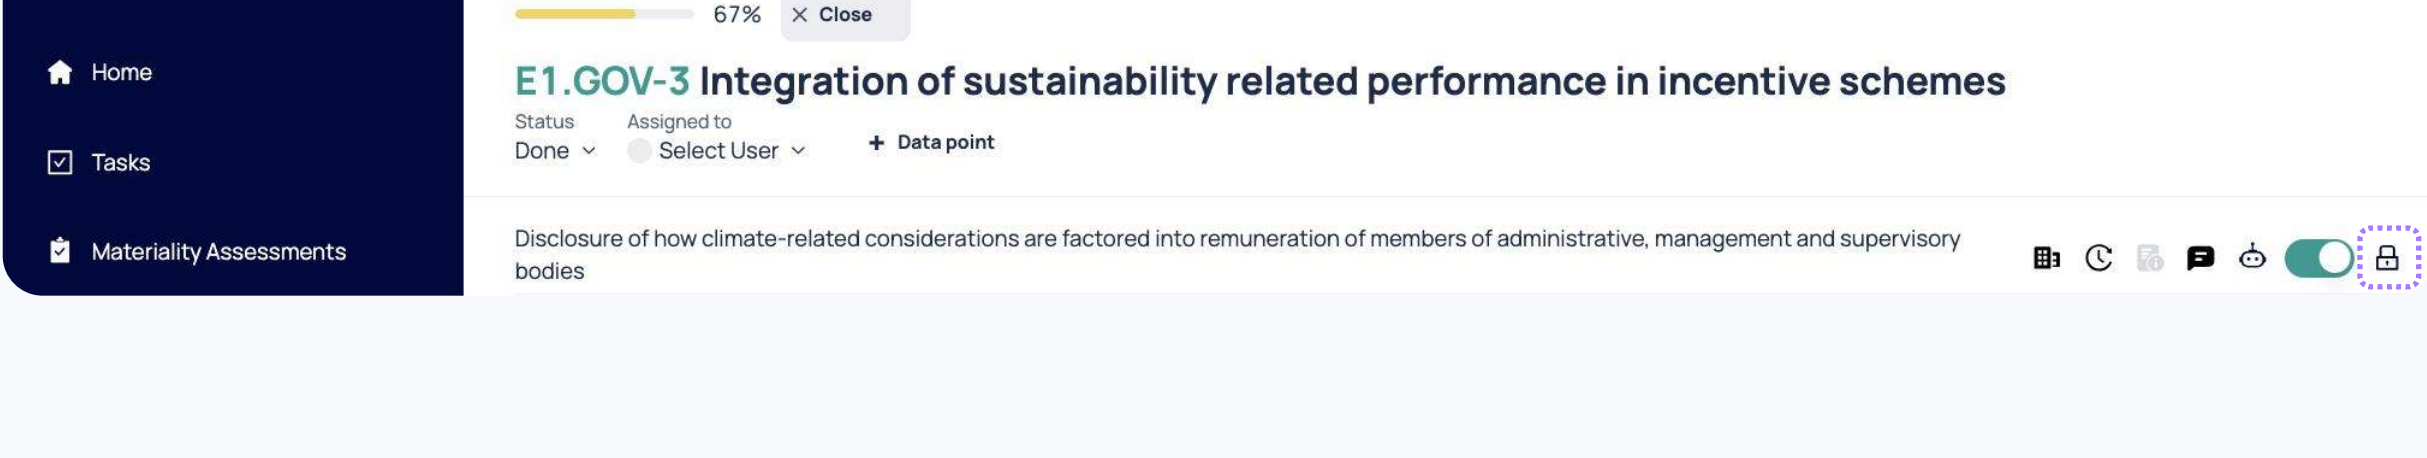

New Task Management

Status Tracking: Keep tabs on the progress of your Double Materiality Assessment (DMA) and sustainability reports with a quick status overview.

Data Locking for Administrators

Protect Data Integrity: Administrators can now lock specific data points, preventing accidental edits and maintaining data integrity.

Year-to-Year Data Cloning

- **Simplified Data Cloning:** Administrators now have the option to clone data year-over-year for GHG and Sustainability reports.
- **Note:** Cloning for Double Materiality Assessment (DMA) data is currently unavailable.

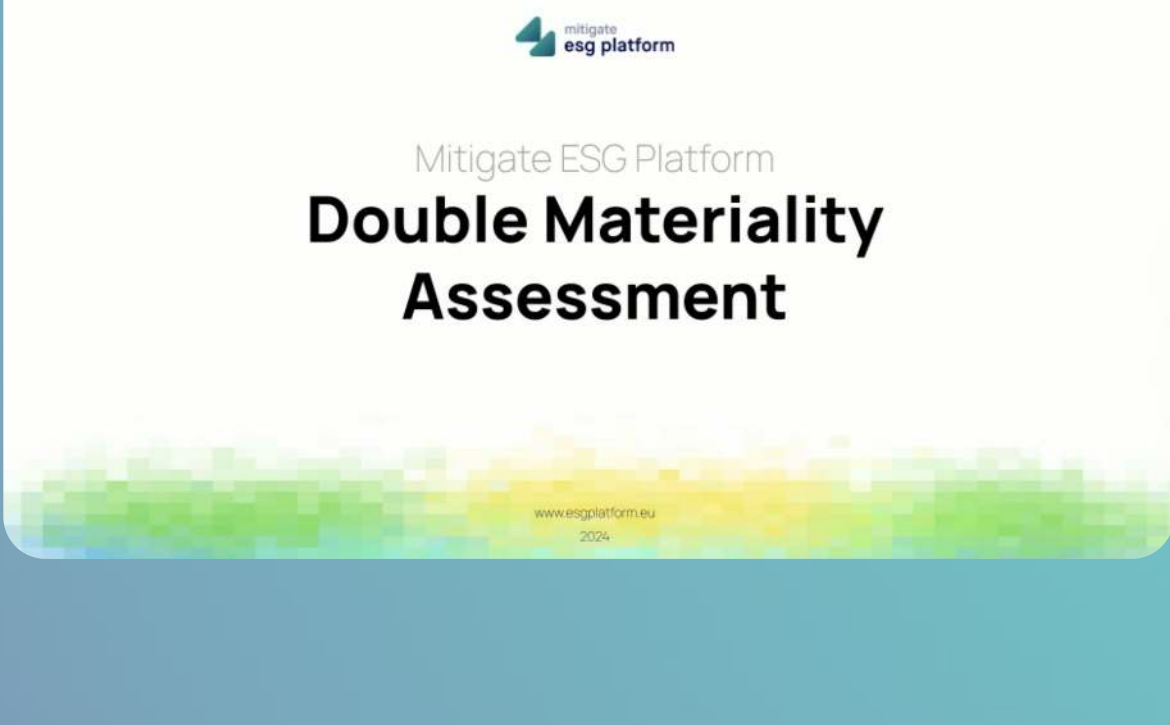

Updated Privacy Policy and Terms of Service

Our [Privacy Policy](#) and [Terms of Service](#) have been updated. Please review the changes to stay informed about your rights and obligations.

New Platform Tutorial Videos

Check out our new tutorial video in the [“Knowledge Share”](#) section, introducing the main steps for getting started on the platform.

This brief video offers practical tips to help you maximize the platform's potential. We'll regularly update this content with new tutorials to support your journey.

Upcoming Enhancements

Soon, we'll be rolling out usability improvements for the Double Materiality Assessment (DMA) process, making it even more intuitive. We're also introducing visualizations for key performance indicators (KPIs) and refining both the auditor mode and the visual design of sustainability reports to deliver a cleaner, more streamlined experience.

Share Your Feedback

Your feedback is invaluable! Please reach out to us at esg@mitigate.dev to share your thoughts, so we can continue enhancing the platform to meet your needs.

Warm regards,
The Mitigate ESG Team
